STATE LETTER No. 187

SUBJECT INDEX CATEGORY: 7

June 4, 1986

SUBJECT: HOSPITAL EMERGENCY ROOM SERVICES

This letter clarifies HCFA policy regarding the use of registered nurses and physician assistants in hospital emergency rooms.

42 CFR 405.1033 (c)(3) states that a physician must see all patients who arrive for treatment in the emergency room. The interpretation of this requirement provided by the Bureau of Eligibility, Reimbursement and Coverage is that a physician must see all patients who are determined to need emergency care.

A registered nurse or a physician assistant may be utilized for purposes of triage, in accordance with State laws and hospital bylaws, to screen out those patients who do not have a true emergency requiring the services of a physician. All patients determined to have a medical emergency must, however, be seen by a physician.

Because there is no universally accepted definition of what constitutes a medical emergency, the surveyor must determine if the facility has formulated criteria regarding which patients must be seen by a physician and which may be seen by a registered nurse or physician assistant. Secondly, the surveyor must review emergency room records to ascertain if the facility is following its own criteria.

If you have any questions, please call Arthur E. Lagace, Ph.D. at (206)442-0767.

Sincerely,

Thomas G. Wallner
Associate Regional Administrator
